

Forrest Medal Stirling 2010

Primula

‘Broadwell Milkmaid’

Exhibited by

Cyril Lafong

Cyril is holding his latest Forrest Medal Plant as if it were a football which he had just caught. Once again almost the first plants you saw when you came into the hall were the top winners. ‘Football’ is correct for the size of the plant as it is truly magnificent. At this stage in its growth the flowers are right on top of the foliage with not a leaf to be seen. It is impossible to count the individual flowers well over 1000. Always the man to beat at SRGC shows, Cyril has started 2010 in terrific style. I am told he is now retired so he will have more time to devote to his plants. We may need stronger tables and a bigger hall.

Cyril not only grows perfect medal winning plants, his entries in other classes are perfectly presented and often feature new and unusual plants. Well done again Cyril. Your success is based on good choice of plants, taking care of the plants and growing them to maturity and then bringing them along for all the rest of us to see and admire.
