

The Scottish Rock Garden Club Forrest Medal Glasgow 2013

Best Plant in the Show *Androsace hirtella x cylindrica* Shown by Ian Kidman

Ian Kidman stormed the prize list at Glasgow with a mouth watering range of superbly grown rock garden plants. Referred to as a 'cross-border raider' by Show secretary John, everyone in the hall was delighted to have been raided by such an expert. Several of his plants might have won, as could those from other growers as this was a fabulous show.

Ian himself thinks that raising the big plant of *Ranunculus alpestris* was a greater challenge! Whatever! -as they say these days both are splendid.

What a triumph to win a 3 pan class with 3 white flowered plants!

Well done Ian and Keep on crossing the border from Northumberland.
